

TVC LEISURE

Gaming and Amusement Machine Supplier

February 2020 Newsletter

Welcome to our February Newsletter

It's been another busy month for us here at TVC Leisure with lots to report on, so let's get straight into it.

Our engineers completed four new site installs this month, two of which took place in Fareham Hampshire and two in Oxford. We installed a variety of fruit machines, digital gaming machines, digital jukeboxes, and pool tables to these new customers, and are excited to now be offering them an unparalleled level of service to complement their new equipment. Several upgrades also took place throughout February, with a number of Winner pool tables and Lightning digital jukeboxes being installed at our loyal customers' premises.

On February 4th and 5th we showcased our latest range of gaming and amusement machines at the Pub20 trade show, held at Olympia, London. The show was a huge success and I would like to thank everyone who came to see us. It was so nice to meet with our customers who attended the show, to catch up with them and demonstrate the new models of machines that will be available to them this year. We had a very positive response to our range of digital gaming machines that were on display, which resulted in a large number of orders and appointments being booked in. The success of Pub20 has prompted us to already pre-book our spot for Pub21 next year. Watch our [Pub20 video](#).

The new polymer £20 note was released on 20th February, and our engineers have been busy all month upgrading our machines to ensure they accept the new currency. We are about 80% complete, with the remaining machines scheduled to be upgraded within the next couple of weeks. If your machine hasn't been upgraded yet please bear with us. The withdrawal date for the old £20 note has not yet been set, so our machines will be accepting both new and old £20 notes for the time being.

I'm very excited to share with you that TVC Leisure are in the process of upgrading our website. Although our current site has served us well over the years, the layout and design are in need of modernisation in order to bring the site up-to-date and inline with the rest of our online presence. The fundamental objective is to improve the user experience on both desk top and mobile devices, which accounts for 60% of our traffic. We want to offer informative content with supporting images and videos of the latest models of machines we supply, and express our proud family values which represent the core of our business.

Adam Jenkins
Managing Director, TVC Leisure
